

# ONLINE SAFETY

Check your privacy settings on all digital data

## WHY IS ONLINE PRIVACY IMPORTANT?

To keep you and your family safe from hackers, cybercriminals, and online bullies or predators.

To avoid identity theft (ages 0-18 are TWICE as likely to be victims of identity theft.)

To protect your reputation now and in the future.

Your Snapchat Map displays your location at that time on an interactive world map.

Think of one of your current passwords.

Do you use the same password for multiple accounts?

AVOID THESE COMMON PASSWORDS:

- Address/phone number
- Location
- Gender
- Pet's Name
- Sports/Number

•Secure your account (example Instagram):

- Is someone impersonating you?  
•Go to: 'Impersonation Accounts Page'
- Has your account been hacked?  
•Report under 'Hacked Accounts'
- Reset your password if you feel threatened

## DOWNLOADING APPS

### Warning Signs

Downloading an app that has not at least been reviewed or is not in your App store is very risky.

### Bad Grammar in the Description

Be careful before downloading an app that has bad grammar.

### Strange Permissions

This is a warning sign. It could have malware, or use data from your phone for criminal purposes.

### Updates

Taking time to update apps when your phone requests it. Read the updates that the app lists.

## What you do online can affect your family too!

**Credit Card Information**

**Computer Viruses**

**Offensive Pictures**

# SECURITY CHECK

## ONLINE BRANDING

What do your selfies, pictures, texts and posts say about you?

## BEWARE OF SCAMS!

Threats or sense of urgency?

Too good to be true?

Poor grammar and/or spelling?

Unfamiliar email addresses?

Fake "click here" links?

## A Warning About Defaulting to WiFi

Leaving your device defaulted to pick up WiFi could leave you vulnerable to **malware, hacking, or data theft** from a bogus or unsecured WiFi that are set up to snare unsuspecting users who come within range.

**Keep Snapping On!**
